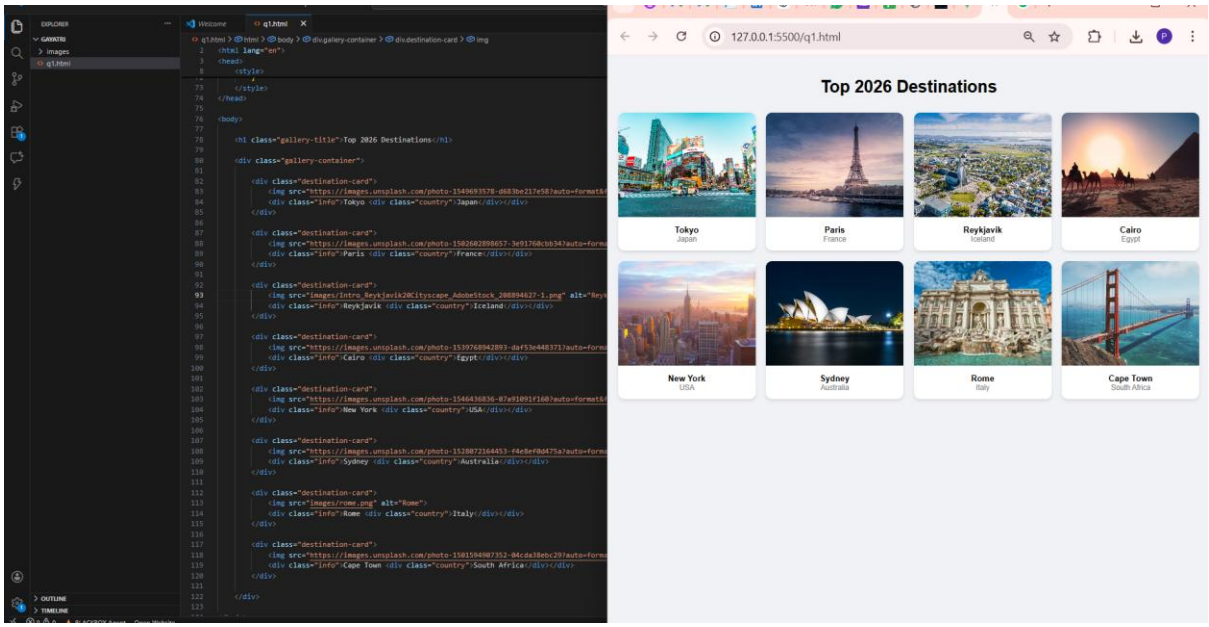
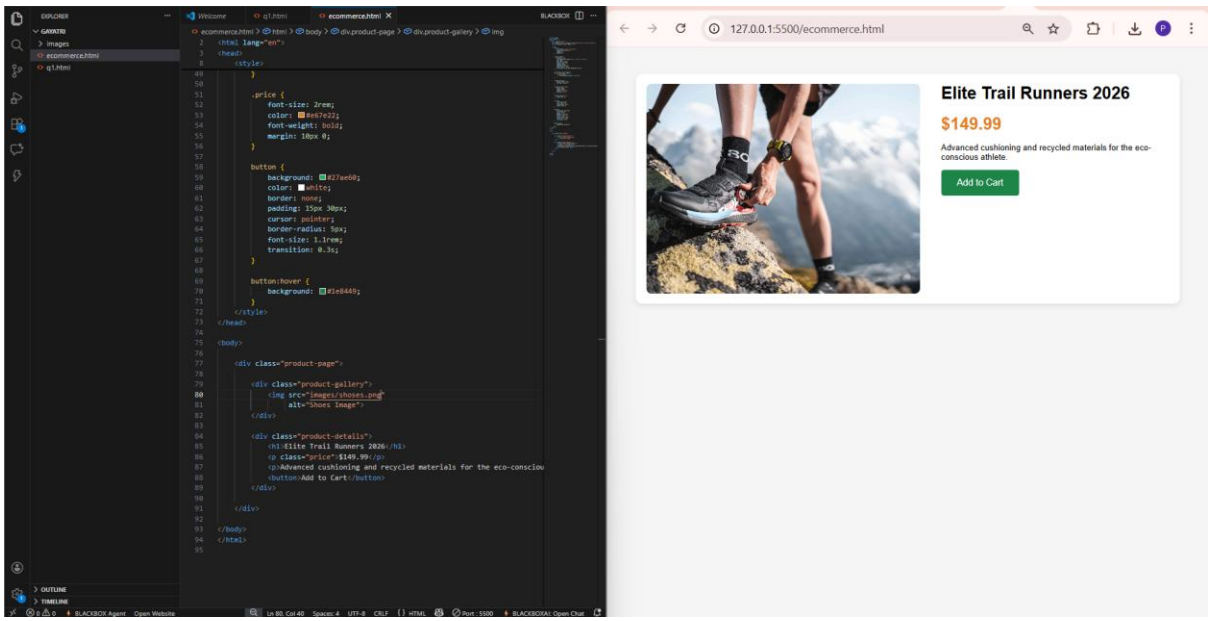
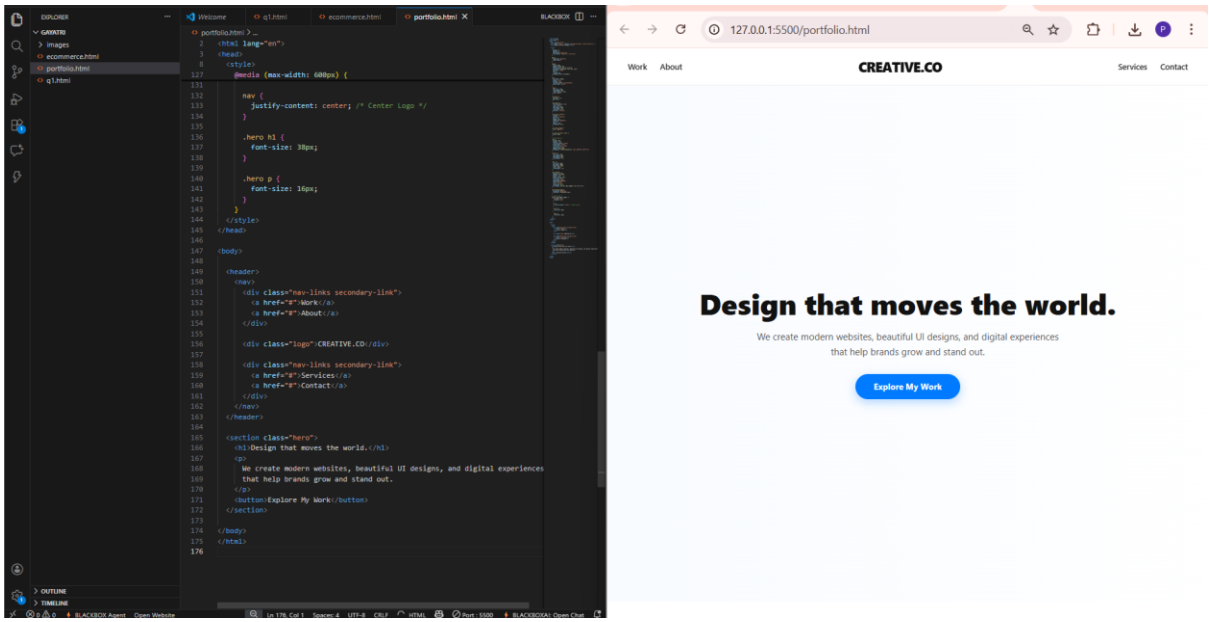
Travel Destination Gallery: Create a responsive image gallery for top 2026 travel destinations where images are displayed in 4 columns on desktop, 2 columns on tablets, and 1 column on mobile.



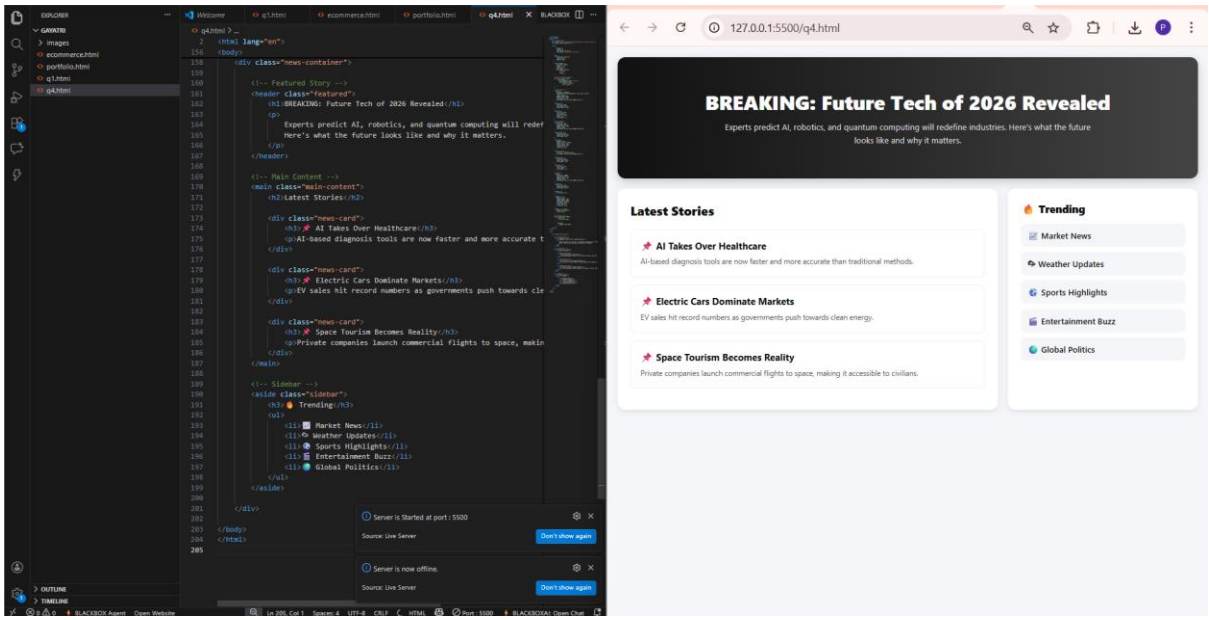
E-commerce Product Page: Build a product showcase featuring an image gallery and price details that uses CSS Grid to stack content vertically on mobile but side-by-side on wide screens



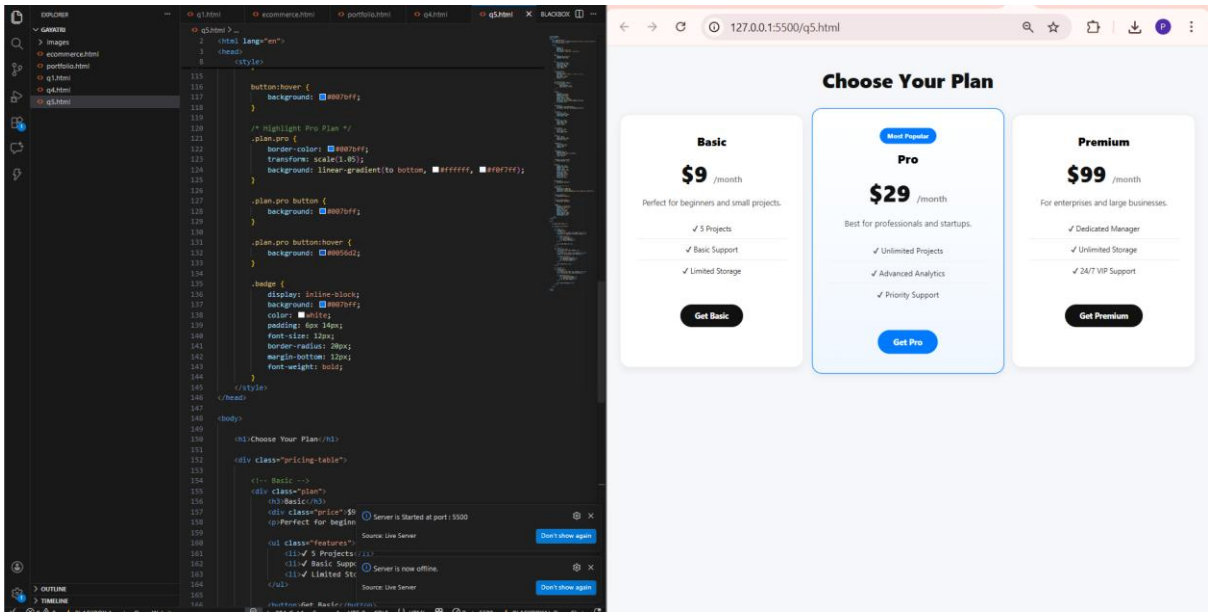
Modern Portfolio Header: Design a responsive navigation bar and hero section that uses media queries to hide secondary links and center the brand logo on screens smaller than 600px



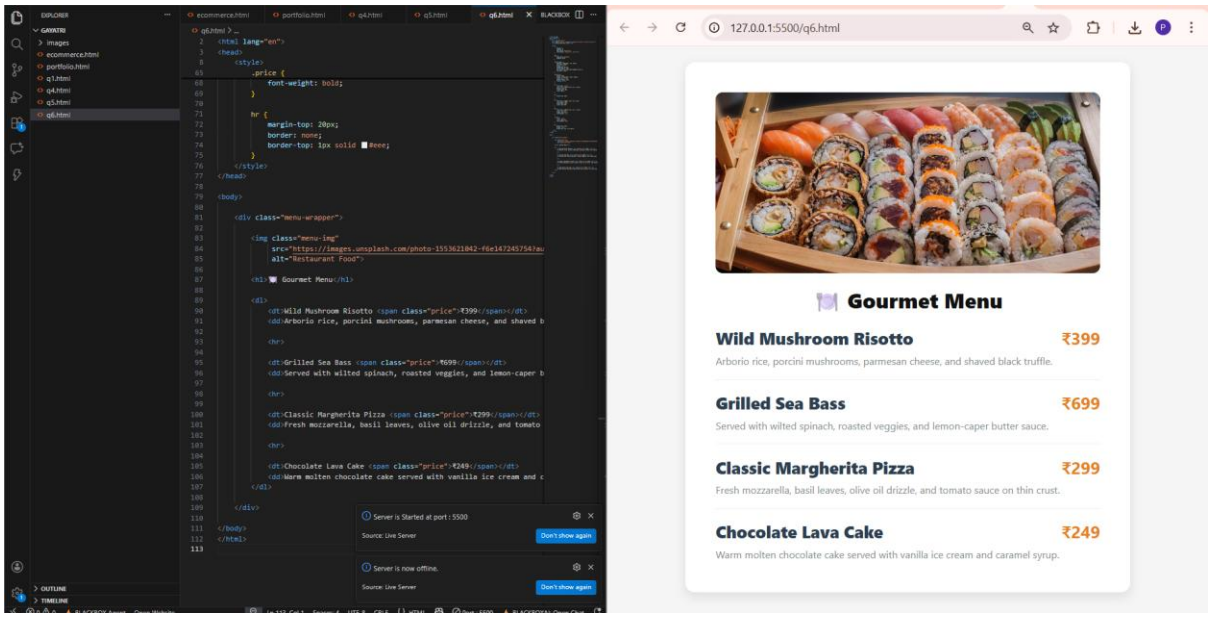
News Portal Layout: Create a responsive news grid with one large "Featured Story" at the top and a three-column sidebar that moves below the main content on tablets.



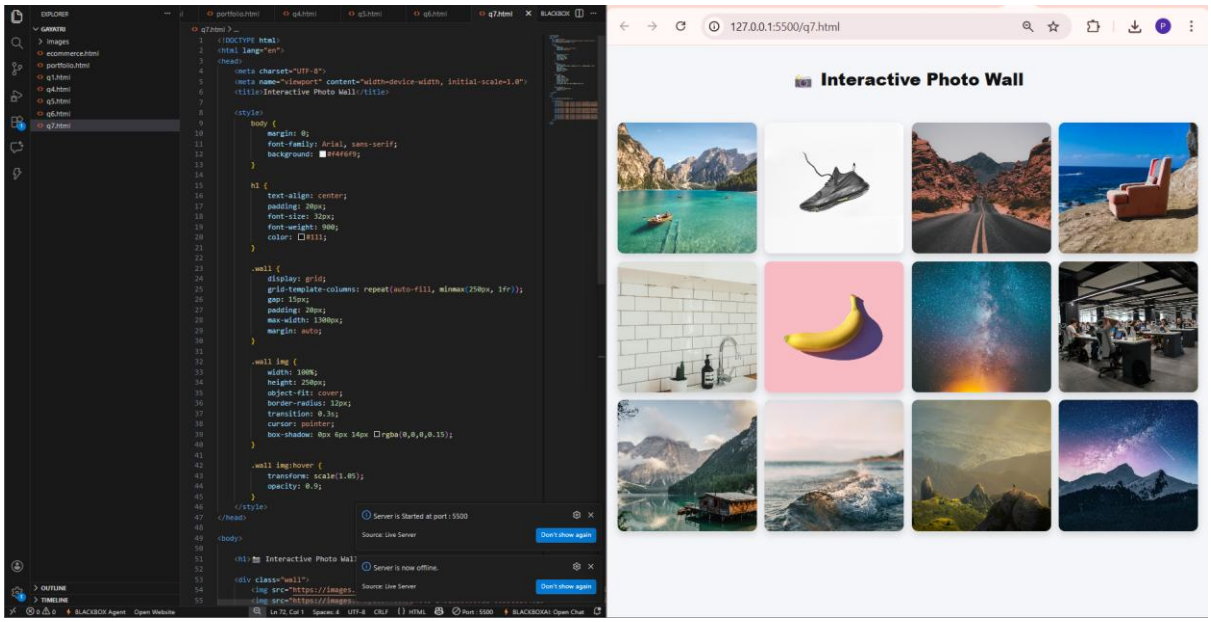
Service Pricing Table: Construct a three-tier pricing layout (Basic, Pro, Premium) using Flexbox that shifts from a horizontal row to a vertical stack on mobile devices



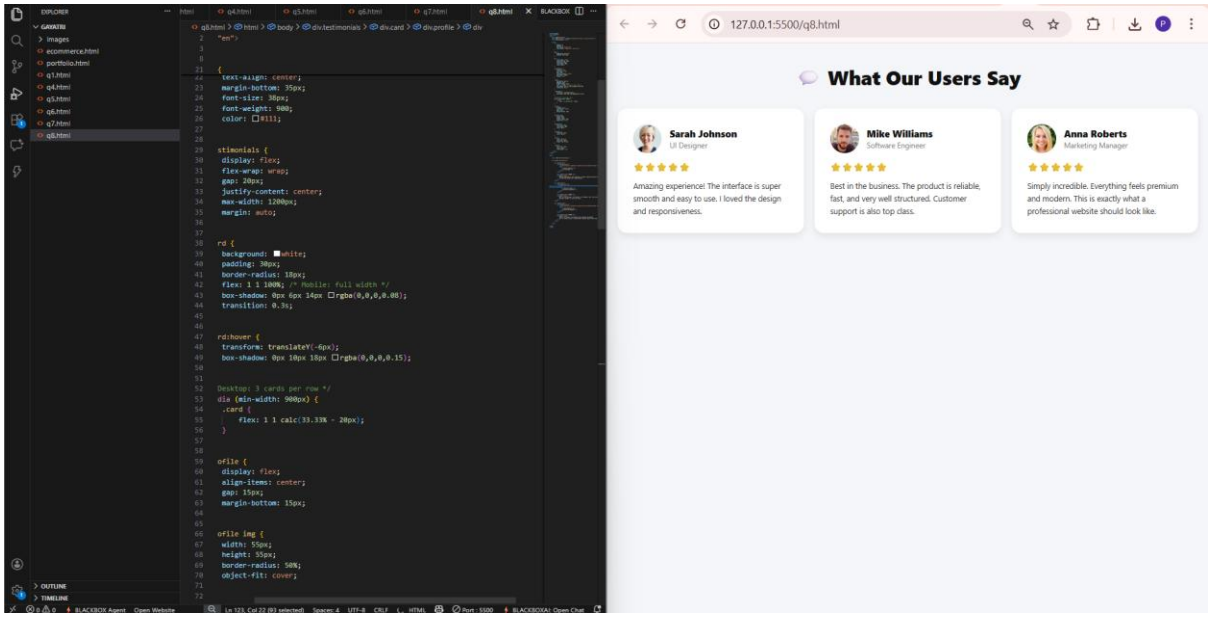
Restaurant Menu Card: Design a digital menu using description lists () that adjusts font sizes and image dimensions dynamically using the clamp() function for different viewports.



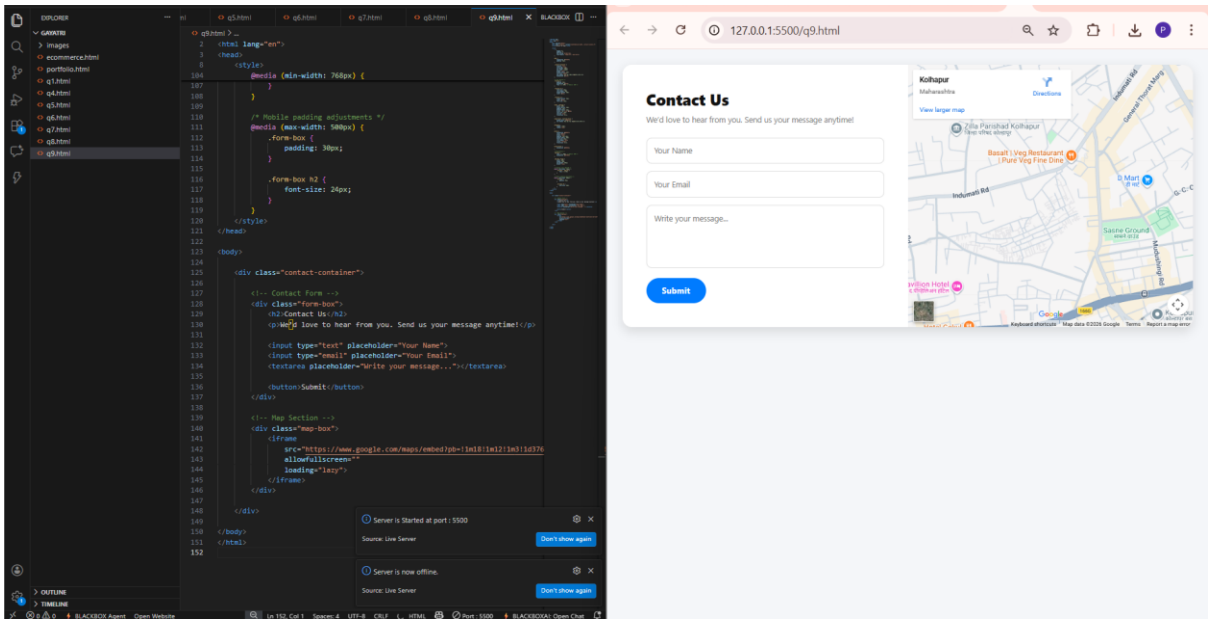
Interactive Photo Wall: Build a gallery of 12 images using grid-template-columns: repeat(auto-fill, minmax(250px, 1fr)) to make the layout automatically responsive without using specific breakpoints.

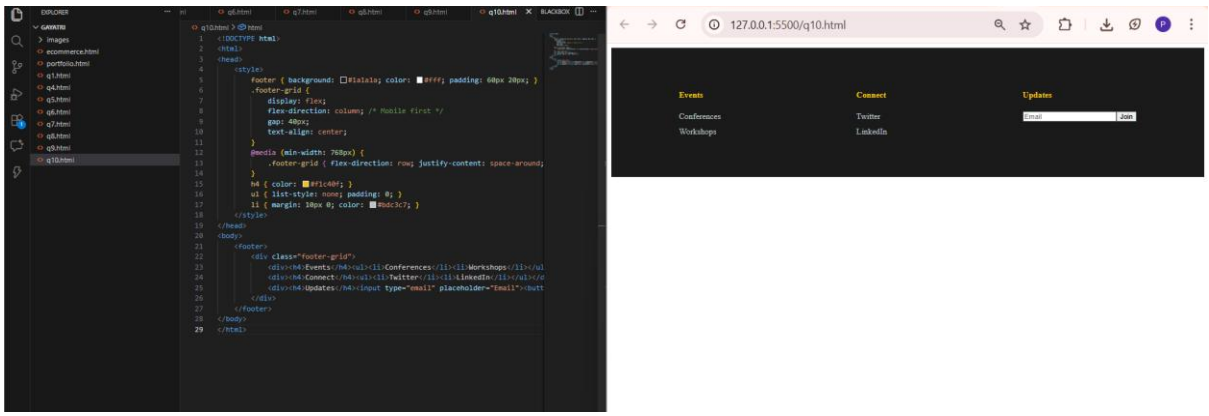


User Testimonial Slider: Create a section featuring user reviews that displays three cards per row on desktop and transitions to a single-card view on mobile using the flex-wrap property



Contact Us Page with Map: Develop a layout with a contact form and an embedded map/image where the form width expands to 100% on mobile but stays at 50% on desktop





Global Event Footer: Construct a multi-column footer containing links, social icons, and a newsletter signup that collapses into a single-column centered layout for small screens.
